Major American Short Stories A. Walton Litz 1994-05-19 This third edition of a highly successful anthology traces the development of the American short story from such early practitioners as Washington Irving (Rip Van Winkle), Edgar Allan Poe (The Fall of the House of Usher), and Melville (Bartleby the Scrivener) up to the present day, and has a better representation of women writers and writers of colour than the previous editions. Among the strands of development which the editor identifies are 'Regionalism and Realism' (Mark Twain: The Celebrated Jumping Frog of Calveras County), and the establishment of the short story as 'A National Art Form' (Edith Wharton: Roman Fever, Scott Fitzgerald Babylon Revisited, Hemingway Big Two-Hearted River, William Faulkner That Evening Sun). Among the contemporary writers represented are: Philip Roth, John Updike, Robert Coover, Joyce Carol Oates, Alice Walker and Raymond Carver.

The Last Traverse Ty Gagne 2020-11-11 On a mountain somewhere above treeline, in some of the coldest and worst winter conditions imaginable, two men lie unconscious in the snow as explosive winds batter the nearby summits. In The Last Traverse: Tragedy and Resilience in the Winter Whites, Ty Gagne masterfully lays out the events that led up to an epic and legendary rescue attempt in severe and dangerous winter conditions in the White Mountains of New Hampshire. More than a cautionary tale, it is a tribute to all the volunteers and professionals who willingly put themselves in harm's way to save lives. This is a must read for anyone who hikes the Whites. "In his first book, Where You'll Find Me: Risk, Decisions, and the last Climb of Kate Matrosova, Ty Gagne established his credentials as a writer of well-researched and objective analysis of mountain accidents. Moreover, Where You'll Find Me reads like a novel, a book I couldn't put down. In his latest book, The Last Traverse, Gagne takes the combination of analysis and storytelling to a new level in a tale of survival and tragedy in the White Mountains." -Mark Synnott, author of The Impossible Climb: Alex Honnold, El Capitan, and the Climbing Life and The Third Pole: Mystery, Obsession, and Death on Mount Everest

Fundamentalism Malise Ruthven 2005-03-24 Since the end of the Cold War fundamentalism has been seen as the major threat to world peace and prosperity, a concern that was exacerbated by the events of 9/11, and the 'War against Terrorism'. But what does 'fundamentalism' really mean? Since it was coined by American Protestant evangelicals in the 1920s, the word has expanded its meaning to include radical conservatives or ideological purists in many spheres of activity, not all of them religious. Modern applications of fundamentalism include Islamist radicals in the Muslim world, the militant Israeli settlers who oppose them as well as Sikh, Hindu and even Buddhist nationalists who seek to justify their political agendas by reference to divine edicts or religious tradition. This exciting new book tackles the polemic and stereotypes surrounding this fascinating subject.

Hindu Revivalism in Bengal, 1872-1905 Amiya P. Sen 2001-02-28 This work is an intensive study of certain facets of social and intellectual life in Bengal between

1872 and 1905, particularly Hindu revivalism. The period under discussion represents significant progress in the area of social and religious reform as well as a period which witnessed hostile attitudes towards such reforms. This is probably the first major work concerning the controversy that surrounded the Brahmo Marriage Bill of 1868–72 and the Consent Bill of 1890–92. The major source material for this book comprises contemporary Bengali literature, including essays, newspaper articles and correspondence, novels, short stories, drama, and poetry. Though this study purports to be a history of intellectual life in Bengal and the broader intellectual trends and movements, it is largely an examination of certain developments centred in or around Calcutta.

I Murdered Your Mother, I Think? Robert Beckstedt 2018-11-30 Maria the nurse and nanny - invoking Haitian Voodoo to protect those she loves from her damaged, violent sister Andrea. And Michael - the wealthy man between them, fighting desperately to save his baby son and escape with the sister he truly loves. This exhilarating saga of love and revenge sweeps us from Hispaniola in 1916, where the sisters' family originated in poverty and slavery, to the lurking drug culture of Balboa, Panama, and finally, to the United States. The ripples of the sisters' family history spread insidiously and threaten all that Michael has built. Will the Voodoo that was meant to protect save them? Or will it finally bring disaster upon Michael, Maria, and everything they love?

India and China in the Colonial World Madhavi Thampi 2017-07-06 India and China in the Colonial World brings together thirteen essays by eminent Indian and Chinese scholars as well as young researchers who look at the multidimensional interaction between the two countries. This interaction was of many kinds and took place at various levels. This volume casts new light on some of the problems that have confronted the relations between India and China as new states and, in doing so, challenges stereotyped images of this relationship. The major areas of India-China relationships covered in this book include some aspects of the situation during and after World War II. Some papers, such as those on the importance of Shanghai in Sino-Indian trade, the presence of the Chinese community in India and Indians in China; Indian fighters in the Taiping Rebellion; Gandhi and the Chinese in South Africa; and ties between south-west China and north-east India during World War II; present the findings of new research. Others such as those pertaining to India-China relations in the period, such as the opium trade; the controversial visit of Rabindranath Tagore to China; and the complexity of Subhash Chandra Bose's position with relation to both China and Japan have been put in a new light. The essays in this book are particularly relevant as they help to understand the relationship between India and China in the context of a historical perspective.

Inside India Halid  Edib 2008-11-26 First published in 1937, this book presents the author's personal account of India. The author, a Turkish writer and novelist, visited the region in 1935 and gained insights into the history and sociology of the country. Based on her experiences, Halid  Edib documents significant contemporary events which shaped the history of India at the time, including the Hindu-Muslim separatism and the freedom movement led by Mahatma Gandhi. Her work is by far the most eloquent account of Indian society and politics in the 1930s. Here she details her travel to several regions such as Aligarh, Lahore, Calcutta, Peshawar, Lucknow, Bombay, and Hyderabad, as well as her meetings with many people from different walks of life. She takes a look at Indian nationalism, identifies its strengths and weaknesses, describes its encounters with colonialism, and analyses the rising tide of Muslim nationalism. With scholarly finesse, she reveals the Indian personality of Muslims in India and shows a favourable disposition towards the perspective of the Congress Muslims.

Region, Nation, "Heartland" Gyanesh Kudaisya 2006-09-05 This book interrogates Uttar Pradesh's identity as India's "heartland" and unravels the historical processes that have shaped this region. In looking at this constructed identity of the state it argues that UP's existence as a "region" cannot be taken uncritically as a given, considering the complex and divergent traditions that have been constituent of the state. It makes the case that UP has been imagined in multiple ways and explores five such distinct, though overlapping, constructions through its modern history: UP as a "colonial heartland", as a "nationalist heartland", as a "Hindu heartland", as a "Muslim heartland", and finally as a "postcolonial heartland". The book closely examines UP's transformation from a colonial to a postcolonial society, looking at issues of identities, mobilization and governance. With its size, location and demography, UP has occupied a distinct position within India's body politic. In the last two decades, the state has seen dramatic political change, marked by fragmentation along lines of religion, region, class and caste. Region, Nation, "Heartland" offers insights into factors that lie behind this social and political churning, which promises to transform not just UP, but India itself. The book offers a fresh perspective into the dynamics of how "regions" have contributed to the projects of state and nation-building in South Asia.

Laws of Physical Time Dillon Ross Grable 2019-12-16 Physics leaves big questions unanswered. For example, why does time seem to move only from the past toward the future? In fact, there is no good definition of past, present, and future. Experiments show there is no universal "flowing river of time." Is time "the fourth dimension?" Is there a "place" we can visit called "the past?" Is there no unifying theory to join the theories of quantum mechanics and relativity? The nature of time is critical in answering these questions. Physics is not wrong â simply incomplete. More facts have been learned about our universe in the last thirty years than have been learned in all of previous history. Mostly what has been learned is how little we actually know. The nature of time is a good example. This book describes experiments that have proved that gravity, velocity, and acceleration slow time. Analysis shows that (1) perception of distance and time depends on relative velocity, (2) time can slow and stop, (3) time gets really strange near black holes, (4) photons traveling toward each other at the speed of light see the other moving only at the speed of light, due to time effects; and there are other strange effects. The truth is that most time experiment results have no real explanation. In physics there is no good definition for time and no logic foundation for a definition of time â until this book. Enter the new science and technology of time. Here the relatively new sciences of computer technology and communication theory have an important contribution to make. At the heart of the science we find the computer logic of state machines and the physical structure of information as a physical entity. In this world, "state change" is the pivot around which the world turns. We learn that logic is essential for understanding how time works. We discover how state change is essential for the very existence of time! Logic symbols provide a framework for thought about time. We even find a basis for some of the definitions physics has been searching for. We find an information-based state- transition-based definition of time. There is a way to define past, present, and future. In this book we find very compelling motivation for some interesting conclusions. For example, time is essentially the result of state transitions. If nothing happens, there is no evidence of time passing. We find that energy exchange motivates time. There is no experience of time without sequence of events. Could the new science and technology of time be the next leap forward in physics? Many current science writers seem to think so.
