Hindu Revivalism in Bengal, 1872–1905 Amiya P. Sen 2001-02-28 This work is an intensive study of certain facets of social and intellectual life in Bengal between 1872 and 1905, particularly Hindu revivalism. The period under discussion represents significant progress in the area of social and religious reform as well as a period which witnessed hostile attitudes towards such reforms. This is probably the first major work concerning the controversy that surrounded the Brahmo Marriage Bill of 1868–72 and the Consent Bill of 1890–92. The major source material for this book comprises contemporary Bengali literature, including essays, newspaper articles and correspondence, novels, short stories, drama, and poetry. Though this study purports to be a history of intellectual life in Bengal and the broader intellectual trends and movements, it is largely an examination of certain developments centred in or around Calcutta.

The Insurrection of Little Selves Aditya Nigam 2006 This book argues that in times of crises, Nehruvian secular-nationalism has shown itself to be fundamentally Hindu in its latent assumptions. Its quest for a national culture has led it to produce the dominant

culture as the norm and so marginalise minority cultures.

Antiquarianisms Benjamin Anderson 2017-05-31 Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises, although both existed long before the early modern period and both were (and continue to be) practiced in places other than Europe. Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions, but the clear-cut distinction between “indigenous” and “colonial” archaeologies has obscured the intense and dynamic interaction between these seemingly different endeavours. This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas. Both regions host robust pre-modern antiquarian traditions that have continued to develop during periods of colonialism. In both regions, moreover, colonial encounters have been mediated by the antiquarian practices and preferences of European elites. The two regions also exhibit salient differences. For example, Europeans claimed the “antiquities” of the eastern Mediterranean as part of their own, “classical,” heritage, whereas they perceived those of the Americas as essentially alien, even as they attempted to understand them by analogy to the classical world. These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross-bred antiquarianisms. Rather than assuming that interest in antiquity is a human universal, this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation.

Reforming Public Services in India Poverty Reduction and Economic Management Sector Unit, The World Bank, India 2006-05-10

There has been considerable debate in India about the quality of public service delivery. Various governments have attempted in recent years to improve delivery systems. This study examines 31 such efforts. Focusing on specific innovations in service delivery across India, the study identifies common factors underlying their success. In doing so, it highlights the efficacy of six instruments to improve service delivery—fostering competition, simplifying transactions, restructuring agency processes, decentralization, building broad political support for program delivery, and strengthening accountability mechanisms.

The Puzzle of India's Governance Subrata K. Mitra 2007-05-07 India no longer gets an easy ride as the world's largest democracy. Spectacular terrorist attacks on its Parliament and places of worship, communal riots of unprecedented ferocity, lingering separatist insurgency and violent caste conflict in impoverished regions have combined to cause a closer appraisal of India's capacity to sustain the rule of law. This book shows how governance is high when people follow the rules of transaction, derived from binding custom, legislation, administrative practices and the constitution. The key question that underpins this analysis is why do some people, sometimes, follow rules and not others? This study responds to this central question by looking at analytical narratives of political order in six Indian regional States, surveys of social and political attitudes and extended interviews with political leaders, administrators and police officers. It shows how, by drawing on the logic of human ingenuity, driven by self interest rather than mechanical adherence to tradition and ideology, these regional elites can design institutions and promote security, welfare and identity which enhance governance.

India and China in the Colonial World Madhavi Thampi 2017-07-06 India and China in the Colonial World brings together thirteen essays by eminent Indian and Chinese scholars as well as young researchers who look at the multidimensional interaction between the two countries. This interaction was of many kinds and took place at various levels. This volume casts new light on some of the problems that have confronted the relations between India and China as new states and, in doing so, challenges stereotyped images of this relationship. The major areas of India-China relationships covered in this book include some aspects of the situation during and after World War II. Some papers, such as those on the importance of Shanghai in Sino-Indian trade, the presence of the Chinese community in India and Indians in China; Indian fighters in the Taiping Rebellion; Gandhi and the Chinese in South Africa; and ties between south-west China and north-east India during World War II; present the findings of new research. Others such as those pertaining to India-China relations in the period, such as the opium trade; the controversial visit of Rabindranath Tagore to China; and the complexity of Subhash Chandra Bose's position with relation to both China and Japan have been put in a new light. The essays in this book are particularly relevant as they help to understand the relationship between India and China in the context

of a historical perspective.

Fundamentalism Malise Ruthven 2005-03-24 Since the end of the Cold War fundamentalism has been seen as the major threat to world peace and prosperity, a concern that was exacerbated by the events of 9/11, and the 'War against Terrorism'. But what does 'fundamentalism' really mean? Since it was coined by American Protestant evangelicals in the 1920s, the word has expanded its meaning to include radical conservatives or ideological purists in many spheres of activity, not all of them religious. Modern applications of fundamentalism include Islamist radicals in the Muslim world, the militant Israeli settlers who oppose them as well as Sikh, Hindu and even Buddhist nationalists who seek to justify their political agendas by reference to divine edicts or religious tradition. This exciting new book tackles the polemic and stereotypes surrounding this fascinating subject.

Major American Short Stories A. Walton Litz 1994-05-19 This third edition of a highly successful anthology traces the development of the American short story from such early practitioners as Washington Irving (Rip Van Winkle), Edgar Allan Poe (The Fall of the House of Usher), and Melville (Bartleby the Scrivener) up to the present day, and has a better representation of women writers and writers of colour than the previous editions. Among the strands of development which the editor identifies are 'Regionalism and Realism' (Mark Twain: The Celebrated Jumping Frog of Calveras County), and the establishment of the short story as 'A National Art Form' (Edith Wharton: Roman Fever, Scott Fitzgerald Babylon Revisited, Hemingway Big Two-Hearted River, William Faulkner That Evening Sun). Among the contemporary writers represented are: Philip Roth, John Updike, Robert Coover, Joyce Carol Oates, Alice Walker and Raymond Carver.

Debating Gandhi A. Raghuramaraju 2012-11-09 Gandhi continues to be a subject of enduring interest across the world. A large and diverse range of writings - comparative, expository, dialogical, and biographical - has appeared on Gandhi. This volume puts together different interpretations of the Mahatma's views on myriad issues. It presents contesting positions of renowned scholars on issues critical for understanding Gandhi as a thinker and an historical phenomenon. It examines the impact of traditional ideas and western influences over contemporary environmental movements; Gandhi's idea of truth; his views on women and whether they broke from the thinking of the nineteenth century reformers; and his complex intellectual relationship with the other great champion of India's oppressed classes, Babasaheb Ambedkar. The essays focus attention on issues of continuing relevance - tradition, modernity, nation, women, and caste - thereby giving the volume of a contemporary flavour.

Region, Nation, "Heartland" Gyanesh Kudaisya 2006-09-05 This book interrogates Uttar Pradesh's identity as India's "heartland" and unravels the historical processes that have shaped this region. In looking at this constructed identity of the state it argues that UP's existence as a "region" cannot be taken uncritically as a given, considering the complex and divergent traditions that have been constituent of the state. It makes the case that UP has been imagined in multiple ways and explores five such distinct, though overlapping, constructions through its modern history: UP as a "colonial heartland", as a "nationalist heartland", as a "Hindu heartland", as a "Muslim heartland", and finally as a "postcolonial heartland". The book closely examines UP's transformation from a colonial to a postcolonial society, looking at issues of identities, mobilization and governance. With its size, location and demography, UP has occupied a distinct position within India's body politic. In the last two decades, the state has seen dramatic political change, marked by fragmentation along lines of religion, region, class and caste. Region, Nation, "Heartland" offers insights into factors that lie behind this social and political churning, which promises to transform not just UP, but India itself. The book offers a fresh perspective into the dynamics of how "regions" have contributed to the projects of state and nation-building in South Asia.

Max Weber's Insights and Errors Stanislav Andreski 2013-04-15 Max Weber (1864-1920) is generally recognised as one of the founding fathers of modern sociology. His ideas continue to be discussed by sociologists and historians and much homage is paid

to his contribution to knowledge. However, such is the awe which the breadth of his knowledge inspires that most general books about Weber contain summaries rather than criticism. This book is the first attempt to evaluate Weber's entire work in the light of historical knowledge available today and of contemporary analytic philosophy. Professor Andreski shows where Weber's true greatness lies, which of Weber's ideas are still valid, which need either correction or modification and which merit rejection. Andreski places Weber in his social and cultural context of the intellectual preeminence of German culture in the second half of the nineteenth century. He examines Weber's most famous theses on objectivity, methodological individualism, ethical neutrality; explanation versus understanding; ideal types; rationalisation; bureaucracy, charisma, power, law and religion; as well as the explanation of the rise of capitalism and uniqueness of Western civilization. Andreski concludes by considering what contemporary scholars should learn from Weber if they want to advance further. He argues that the most important lesson is that comparative study of history (including recent history) is the only method of giving empirical support to an examination of large-scale social processes or a general proposition about them. This book was first published in 1984.

What's Wrong With Liberalism? Maureen Ramsay 2004-12-16 'A well argued and clearly written critique of liberal political theory, organized around its leading concepts -very accessible for student use.' Professor David Beetham. In this book Maureen Ramsay provides an accessible and comprehensive critique of the key concepts that underpin liberal political philosophy. Each chapter tackles a different concept and analyses the contribution of representative thinkers in seventeenth- and eighteenth- century liberal thought, and contemporary developments and modifications to classical liberalism. The purpose of each chapter is to evaluate the concepts and theories central to the liberal tradition from a variety of critical perspectives, in order to expose the empirical, theoretical, practical and moral deficiencies at the heart of liberal thought. The arguments presented here challenge the validity of

liberal political ideas, values, institutions and policies, and demonstrate the bankruptcy of liberalism in theory and practice. This book will be essential reading for students of politics, government and moral and political philosophy. Maureen Ramsay is Senior Lecturer in Political Theory at the University of Leeds.

Inside India Halidé Edib 2008-11-26 First published in 1937, this book presents the author's personal account of India. The author, a Turkish writer and novelist, visited the region in 1935 and gained insights into the history and sociology of the country. Based on her experiences, Halidé Edib documents significant contemporary events which shaped the history of India at the time, including the Hindu–Muslim separatism and the freedom movement led by Mahatma Gandhi. Her work is by far the most eloquent account of Indian society and politics in the 1930s. Here she details her travel to several regions such as Aligarh, Lahore, Calcutta, Peshawar, Lucknow, Bombay, and Hyderabad, as well as her meetings with many people from different walks of life. She takes a look at Indian nationalism, identifies its strengths and weaknesses, describes its encounters with colonialism, and analyses the rising tide of Muslim nationalism. With scholarly finesse, she reveals the Indian personality of Muslims in India and shows a favourable disposition towards the perspective of the Congress Muslims.
